Welcome

ESCP First Scientific and Annual General Meeting Lisbon, 2006

Dear Colleagues,

On behalf of the ESCP, we would like to welcome you to Lisbon. This year's meeting is the 1st European Society of Coloproctology Scientific and Annual General Meeting and we hope that you will benefit from the informative programme we have put together.

We are especially pleased that so many high-profile and internationally renowned colleagues have agreed to speak and moderate on the latest developments in the field.

The meeting will open with a clinical skills course demonstrating live operations, which will be broadcast from the University Hospital in Coimbra to the Congress Centre auditorium. There will be symposia on large bowel cancer; anorectal problems in inflammatory bowel disease; new concepts in colorectal surgery; enhanced recovery; constipation and evacuation disorders and European treatment algorithm for anal fissure.

We have selected a total of 77 free papers for oral presentation and the best six will be presented in a separate free-paper session on Saturday. The meeting will conclude with the ever-popular "Consultants' Corner" on Saturday lunchtime and we have invited international speakers, who are acknowledged experts in their field, to take part.

We would like to thank all the sponsors and exhibitors who have contributed to ensure the success of this meeting and the organisers would be grateful if you could take some time to meet them in the session breaks, as their support is vital to the success of our meetings.

Finally, we hope that you will enjoy Lisbon, with its spectacular setting, and wish you all a very successful meeting.

Places of Interest

The capital of Portugal since its conquest from the Moors in 1147, Lisbon remains the only European capital on the Atlantic Coast and is a legendary city with over 20 centuries of history. Radiant skies brighten the monumental city, with its typical tile-covered building façades and narrow medieval streets, where one can hear the fado being played and sung at night. Lisbon is also the stage for popular festivities, the place for exquisite shopping, exciting nightlife and interesting museums. Spread across seven hills, Lisbon offers many delightful and distinctive regions to discover. The Alfama Hill is the oldest part of the city and is crowned by Castelo de São Jorge (St George's Castle). The Baixa is the heart of the city and offers some of the best shopping and hotels. The Bairro Alto is the most fashionable district, with trendy bars and restaurants.

Public Transport System in Lisbon

METRO trains run from 6 am until 1 am. Single trips cost €0.70 for one zone and €1.00 for two zones. A return ticket is €1.30. A packet of 10 one zone metro tickets costs €6.65 and for two zones costs €9.85.
